TWO-YEAR WORKMANSHIP WARRANTY

Roof

Your two-year coverage

Gold Label Roofing warrants its workmanship on the roof work identified in your signed project agreement for two years beginning on the day of installation. If services are installed on different days, each service's coverage begins on its own installation day. Coverage applies to installation defects in work performed by Gold Label Roofing or its installation crews, within that agreed scope.

What we cover

Roof: Leaks or loose roofing caused by improper fastening, flashing, or sealing in the roof work we performed.

How covered problems are corrected

We will inspect the reported concern and correct covered workmanship defects at no charge, including labor and materials needed for that correction.

Product warranties are separate

This is an installation warranty, not a warranty against manufacturing defects. Any manufacturer warranty is provided under that manufacturer's own terms, duration, exclusions, and claim process. Manufacturer coverage is not guaranteed by this document. A product warranty does not replace our responsibility for covered installation errors.

What this workmanship warranty does not cover

Routine cleaning or maintenance, normal wear, or problems caused by product defects, wind, hail, falling objects, misuse, ice buildup, building movement, pre-existing conditions outside our work, or later alterations by others are not covered unless attributable to our workmanship. Maintenance or alteration issues do not automatically cancel unrelated coverage.

Limits of this limited warranty

The remedy provided by this express workmanship warranty is correction of the covered installation defect, not automatic replacement of an entire system. Unrelated upgrades, routine maintenance, and third-party work are not included. Obtain our written authorization before commissioning non-emergency warranty repairs by others. Reasonable emergency measures to protect people or property do not automatically cancel coverage. To the extent permitted by applicable law, this express warranty does not cover indirect or consequential losses. No provision excludes liability or rights that cannot lawfully be excluded.

Request service

Call 502-536-5398 promptly when you notice a concern during the warranty period. Provide your address, job details, a description, and photos taken safely. Allow access for inspection and correction. For active leaks, take safe steps to limit damage and retain records. Repair under this warranty does not restart its two-year term, except as required by law. This document does not waive nonwaivable rights or reduce separately agreed written coverage. Where a limitation is prohibited by law, it does not apply.

HOMEOWNER CARE GUIDE

Roof

A simple maintenance routine

Check your exterior from the ground in spring, fall, and after severe weather. Leave roof access, high ladders, and repairs to qualified professionals. Follow the care instructions for the exact products installed on your home.

Roof | Check safely

For asphalt-shingle roofs, look from the ground in spring, fall, and after severe weather for missing or lifted shingles, loose flashing, or debris. Report new ceiling stains or attic moisture promptly.

Roof | Protect shingles and ventilation

Do not pressure-wash shingles, scrape moss, or walk on the roof. Use a qualified professional for cleaning and repairs, following the installed product instructions. Keep vents clear; consult us before roof penetrations or equipment installation.

Report concerns and keep records

Call 502-536-5398 for leaks, loose components, or suspected damage. Share your address and photos taken from a safe location. Keep your project agreement, installation records, product details, warranties, and maintenance records.

Care and warranty are different

These care instructions do not create or extend warranty coverage. Gold Label Roofing's two-year workmanship warranty addresses covered installation errors. Product defects are handled separately under any applicable manufacturer warranty.
